**Question 1**

Not yet answered

Marked out of 1.00

What is the result ?

```
Runnable r = new Runnable() {  
    public void run() {  
        System.out.print("cat");  
    }  
};  
Thread t = new Thread(r) {  
    public void run() {  
        System.out.print("Dog");  
    }  
};  
t.start();
```

- ☐ a. No output
- ☐ b. Dog
- ☐ c. Cat
- ☐ d. Compilation fails
- ☐ e. Exception

**Question 2**

Not yet answered

C++ default argument output?

```
#include <iostream.h>  
void func(int a, bool flag = true) {  
    if (flag == true) {  
        cout << "flag is true a = " << a;  
    } else {  
        cout << "flag is false a = " << a;  
    }  
}  
int main() {  
    func(200, false);  
    return 0;  
}
```

- ☐ a. flag false 100
- ☐ b. flag true
- ☐ c. flag false 200
- ☐ d. flag true 100

**Question 3**

Not yet answered

Marked out of 1.00

```
10. interface A { void x() ; }
11. class B implements A { public void x() { } public void y() { } }
12. class C extends B { public void x() { } }
And.
20. java.util.List<A> list = new java.util.ArrayList<A>();
21. list.add(new B());
22. list.add(new C());
23. for(A a : list) {
24.     a.x();
25.     a.y();
26. }
```

Calling a.y() in list of A?

- ☐ a. Compile fail line 21
- ☐ b. Compile fail line 25
- ☐ c. Compile fail line 20
- ☐ d. Runtime exception
- ☐ e. No output
- ☐ f. Compile fail line 23

**Question 4**

Marked out of 1.00

```
1. class Eco {
2.     public static void main(String [] args ) {
3.         Eco e1=new Eco();
4.         Eco e2=new Eco();
5.         Eco e3=new Eco();
6.         e3.e = e2;
7.         e1.e = e3;
8.         e2 = null;
9.         e3 = null;
10.        e2. e = e1;
11.        e1 = null;
12.    }
13.    Eco e;
14. }
```

At what point is only a single object eligible for GC?

- ☐ a. After line 11
- ☐ b. Compilation fails
- ☐ c. After line 8
- ☐ d. Runtime exception
- ☐ e. After line 10
- ☐ f. After line 9

**Question 5**

Not yet answered

Marked out of 1.00

```
class Test {
    static String s = "-";
    public static void main(String[] args) {
        try {
            throw new Exception();
        } catch (Exception e) {
            try {
                try {
                    throw new Exception();
                } catch (Exception ex) {
                    s += "ic ";
                }
                throw new Exception();
            } catch (Exception x) {
                s += "mc ";
            } finally {
                s += "mf ";
            }
        } finally {
            s += "of ";
        }
        System.out.println(s);
    }
}
```

Nested try/catch output?

- ☐ a. -mf of
- ☐ b. -ic mc of mf
- ☐ c. -ic mc mf of
- ☐ d. -ic mf of
- ☐ e. -ic of
- ☐ f. -mc mf

**Question 6**

```
class Test {
    public:
        int a;
        char b;
        virtual int add(int a, int b);
};
```

Size of class Test (virtual + int + char)?

- ☐ a. 9
- ☐ b. 5
- ☐ c. 8
- ☐ d. 13

**Question 7**

Not yet answered

Marked out of 1.00

```
1. class A {
2.     public void process() {
3.         System.out.print("A ");
4.     }
5. }
6. class B extends A {
7.     public void process() throws RuntimeException {
8.         super.process();
9.         if (true) throw new RuntimeException();
10.        System.out.print("B");
11.        public static void main(String[] args) {
12.            try {
13.                ((a) new B()).process();
14.            } catch (Exception e) {
15.                System.out.print("Exception ");
16.            }
17.        }
18.    }
19. }
```

What is the output?

- ☐ a. A Exception B
- ☐ b. Exception
- ☐ c. A Exception
- ☐ d. Compile fail line 13
- ☐ e. Compile fail line 9
- ☐ f. A B Exception

Which override gives output "b"?

```
import java.io.*;
class Master {
    String doFileStuff() throws FileNotFoundException {
        return "a";
    }
}
class Slave extends Master {
    public static void main(String[] args) {
        String s = null;
        try {
            s = new Slave().doFileStuff();
        } catch (Exception x) {
            s = "b";
        }
        System.out.println(s);
    }
}
```

- ☐ a. throws NumberFormatException, FileNotFoundException
- ☐ b. throws FileNotFoundException
- ☐ c. doFileStuff(int)
- ☐ d. throws NumberFormatException
- ☐ e. doFileStuff(){return "b";}
- ☐ f. throws IOException
